RoHS Compliance

Plastic & Metal Cable Glands | Adapters | Reducers & Enlargers | Grommets & Accessories

UL File #:

E363825

A cable gland is a device that allows the user to pass a cable, wire or tube into an enclosure while providing strain relief and sealing out dust, dirt and liquids. Mencom offers a wide variety of cable glands, from very small (PG7) to very large (M63). Our line of cable glands include plastic and metal varieties with NPT, Metric and PG threading and they are rated to IP68 up to 5 bar that can be used permanently under water up to 5 atmospheres. The sealing around the cable is achieved through the sealing grommet. The sealing against the enclosure is achieved through either an O-Ring (all metal glands and PG29 and larger plastic glands), or, through some raised rings on the underside of the hex nut (all plastic glands up to and including PG21).

Special Applications

- EMI Shielding Brass Cable Glands
- Strain Relief Cable Glands
- Explosion-Proof Plastic Cable Glands
- Cable Entry System

Mencom Cable Glands are easy to use and provide a good strain relief and water tight seal for round cables. The cable glands are rated up to IP 68 (comparable to NEMA 6P). The glands have a wide clamping range.

Mencom EMI Cable Glands provide an easy way to ground the shield from a shielded cable to the body of the metal cable gland. The seal rating is IP 68 (comparable to NEMA 6P).

NPT style cable glands are not supplied with nuts. Nuts can be ordered separately, see page U-5.

Materials:

Body: Nickel Plated Brass
 Insert: Polyamide
 Seal: Neoprene
 O-Ring: BUNA-N

Mencom Cable Glands are easy to use and provide a good strain relief and water tight seal for round cables. The cable glands are rated up to IP 68-5 Bar (comparable to NEMA 6P). The glands have a wide clamping range.

A Locking Nut is supplied on all PG threaded parts. O-Rings are not required to maintain a seal on sizes PG 7 to PG 21, but are supplied on size PG 29 and larger.

Materials:

Body: Nickel Plated Brass
 Insert: Polyamide
 Seal: Neoprene

Mencom EMI Cable Glands provide an easy way to ground the shield from a shielded cable to the body of the metal cable gland. The seal rating is IP 68 (comparable to NEMA 6P).

A Locking Nut is supplied on all PG threaded parts.

Materials:

Body: Nickel Plated Brass
 Insert: Polyamide
 Seal: Neoprene

*** MCG-M06 & MCG-M08 are not supplied with jam nuts. Nuts are not available for these cable glands.

M12 through M32 are also available in Stainless steel. Add "SS" to the part number (e.g. MCG-M12-SS). Stainless steel glands do not come with jam nuts.

Mencom Cable Glands are easy to use and provide a good strain relief and water tight seal for round cables. The cable glands are rated up to IP 68 (comparable to NEMA 6P). The glands have a wide clamping range.

A Locking Nut and an O-Ring are supplied on all Metric threaded Metal Cable Glands, except where noted.

Materials:

Body: Nickel Plated Brass

Insert: Polyamide

Seal: Neoprene

O-Ring: BUNA-N

PCGU-M63	PCGU-M63-B	N/A	27 - 48	63.2	12	68	M63 X 1.5

These Cable Glands have a dual grommet system that allows for a much wider range in diameter than the standard plastic cable glands. Cables that are in the lower part of the diameter range will fit into the cable gland without any change. For cables that are in the upper part of the diameter range, the dome nut is removed and the seals are removed. Separate the inner seal from the outer seal into the cable gland and then put the outer seal back in place. It is now ready for use with the larger cable.

A Locking Nut is supplied on all Metric threaded parts. An O-Ring is not needed on any sizes smaller than M32. An O-Ring is supplied on size M32 and larger.

Materials:

Body: Nickel Plated Brass

O-Ring: BUNA-N

These Explosion-Proof Cable Glands are made of Nickel Plated Brass and are for potentially explosive areas according to EN 50014 and EN 50019. The type of protection is EExd e II-increased safety. There is excellent strain relief, a wide clamping range, and a torsion protected plastic insert that is resistant to impact at cold temperatures. Also, the cable glands feature a neoprene sealing insert, the O-Ring seal is BUNA-N, and the permanent ambient temperature is -25°C to +80°C (-13° F to +176°F). Protection type is IP 68 according to EN 60529, E-Generation, certificate of conformity: DMT 99 ATEX E 016. Locking Nuts must be ordered separately.

ATEX 100a

With a view toward further harmonization of the legal provisions in the European Union in respect to the use of equipment and protection systems in accordance with the regulations in areas subject to explosion hazards, the European Parliament and Council passed Directive 94/9/EC on the 23rd of March, 1994. This directive is also known as ATEX 100A. The period for implementing this guideline started on the 1st of March, 1996 and from the 1st of July, 2003 onwards, it will replace and supplement all directives on explosion protection applicable to date at the European level. The single market requires national regulations to be replaced by European Standards (EN).

The ATEX 100A governs the requirements for all (both electrical and non-electrical) equipment and protection systems which are intended for use in areas subject to explosion hazards. Monitoring, control and safety equipment for use outside areas subject to explosion hazards also fall within the provisions of this directive if they are necessary in view of explosion hazards for the safe running of equipment and protection systems.

The explosion-proof cable glands listed in this catalog are produced in Germany and are for use in areas subject to explosion hazards. Such parts are also termed "cable glands and entry fittings" (abbreviated KLE) and "accessories."

EN 50014 defines cable glands and entry fittings as equipment which allows one or several electrical and/or fibre optic cables or wires to be inserted into electrical equipment while retaining the corresponding type of protection.

The explosion-proof KLE items contained in this catalog are suitable for inserting cables and wires into housing of protection type EEx e "increased safety," and EEx i "inherent safety" in Device Groups II and Categories 2 and 3.

For further information on ATEX and European explosion-proof classifications, please consult the factory.

These specifications are not intended to be correlated to or to be a substitution for U.S. Explosion-Proof ratings.

Intrinsically safe explosion proof versions are also available, please consult the factory.
 Protection type EExd e II is a standard European classification.
 These specifications are NOT intended to be correlated to or to be a substitution for U.S. Explosion-Proof ratings.

Type of protection EExd e II- increased safety. Permanent ambient temperature -50°C to +55°C (-58°F to +131°F). Protection type is IP 66 according to EN 60529. Certificate of conformity: PTB-No. Ex-92-C.3142; PTB-No. Ex-92.C3108X (M12 & M16).

Locking Nuts must be ordered separately.

Metric, PG & NPT Threads Flat & Festoon Cable Glands

Flat & Festoon Cable Glands | Metric, PG & NPT Threads | IP66/IP65 Rating

Cable Glands for Flat Cable Applications

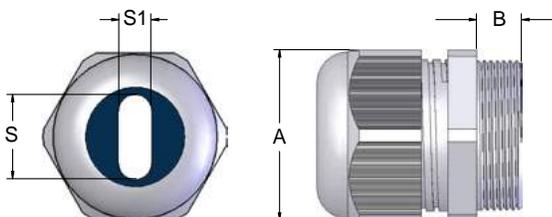

Mencom's plastic and brass cable glands are perfect for flat and festoon cables. Sealing ratings up to IP 66 can be obtained. A Locking Nut is supplied on all Metric and PG threaded parts. An O-Ring is not needed for the plastic style cable glands smaller than M32. O-Rings are supplied on M32 and larger sizes.

Sealing for these cable glands is IP 66 only if the cable matches the slot dimensions exactly. For cables that are less than the "max", but more than the "min", the seals are rated to IP 54.

Longer thread lengths are available for some of these cable glands, please consult the factory.

Test standard EN60529:1991+A1, EN50262:1998, EMKO-TUI (03-SEC) F1001/84
 The IP67 cable range has been tested to the same EN 50262 pull force requirements as Mencom's standard PCG cable glands.

Specifications:

Body: TPE (Thermoplastic Elastomer) and Polyamide
 Temperature: -20°C to +125°C (-4° to +257°F)
 Protection: IP67 and IP65

Height of only 17-20 mm, 5.7 mm on the outside irrespective of size.
 Cable glands are approx. 30-40 mm.

Handles large range of cable and pipe diameters.

Installation time saving up to 90%.

Integrated tension relief

"Pushout" membrane

Ergonomic installation

Self-adjusting to wall thickness 2 - 5 mm.

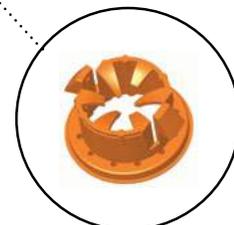

Fixed in both directions when mounted.

Space saving design

Rubber coated tension relief for protection of the cable mantle.

Fixed IP67 / IP65

Click Seal means no material compression during installation.

Cable Glands & Adapters

U

Inserts are intended for use with wires, cables, or tubes that have diameters that are within ± 0.020 " of the "hole diameter" listed. Inserts without holes allow the user to drill holes for low volume, custom applications.

Mencom Multi-Hole Cable Gland Inserts will allow the user to use one cable gland for multiple wires, cables, or tubes. The inserts fit into the Mencom "MCG" or "PCG" cable glands, and will seal to IP 65.

KADP-24-23	23					23						
KADP-24-29	29				29							
KADP-24-BLI	0											

Application

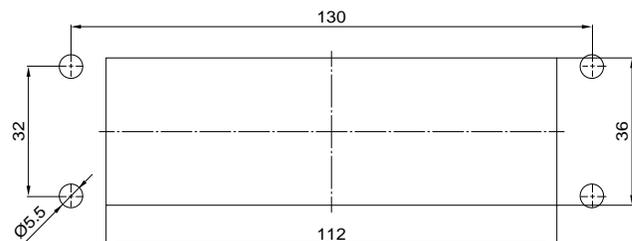

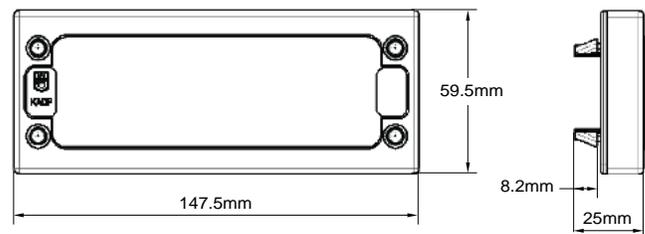

For introduction of cables, hoses, pneumatic and hydraulic lines

Benefits

Fast and simple installation
Up to 10 times faster than with cable glands
Space savings of over 50%

Mounting

Usable on panel cutouts Size 24 ILME industrial multipole connectors (e.g. Harting or Wieland), mounting in wall thicknesses from 1.5 to 2.0mm. For plates with thicknesses greater than 2.0 mm the cable entry plate KADP can be attached with screws.

Hole Dimensions

Specifications:

Flange: Polyamide PA6 V-0
Elastomeric Plate: EPDM
Sealing: TPE
Temperature: -30°C to +100°C (-22°F to +212°F)

KADL Cable Entry						
Part Number	# of Entries	Hole Size mm	Dimension (mm)			
			L	L1	H	H1
KADL-5K	5	125 x 35	153	63	30.3	8.3
KADL-10K	10	125 x 57.5	153	85.5	30.3	8.3
KADL-15K	15	125 x 80	153	108	30.3	8.3
KADL-20K	20	125 x 102.5	153	130.5	30.3	8.3
KADL-25K	25	125 x 125	153	153	30.3	8.3
KADL Expansion Insert						
KADL-EXP	N/A	N/A	153	27	30.3	8.3

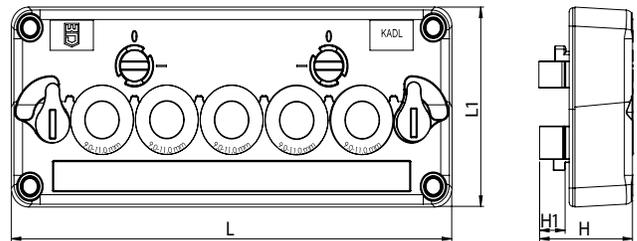

KADL-EXP is an expansion insert for adding 5 holes to an existing 5, 10, 15, or 20 hole frame. Required hole size will change according to the number of expansion inserts used. Maximum frame size not to exceed 25 holes. Grommets ordered separately.

Application

Insertion and sealing of pre-assembled cables with connectors into housings

Benefits

- Modular design and high packaging density
- Grommet clamping range to 2 mm
- Strain relief for cables
- Easy retrofits and adjustments

Mounting

Mounting in wall thicknesses from 1.5 to 2.0 mm
KADL can be attached with screws for wall thicknesses greater than 2.0 mm

Specifications:

Flange: Polyamide PA6 V-0
Sealing: TPE
Temperature: -30°C to +100°C (-22°F to +212°F)
